

# Equity Framework for Career and Technical Education Research

## CENTER EQUITY AT EACH STAGE OF THE RESEARCH PROCESS

Systems for learning and building knowledge, such as career and technical education (CTE), often reproduce inequities unless an equity-focused lens is used when designing, implementing, and evaluating programs.

The **Equity Framework for CTE Research** offers guidance for conducting research with an intentional focus on equity at each stage of the research life cycle.

“ Our utilization of the Equity Framework for Career and Technical Education Research created by the CTE Research Network helped secure this federal grant. Of the five reviewers, FOUR called out our use of the framework in the research design as a strength of our proposal.

— Chaney Mosley, PhD,  
Asst. Professor, Agricultural Education,  
Middle Tennessee State University
